PROJECTS

Lendr — P2P Lending Platform Frontend Development (DeFi)

- Built Vue 3 + Quasar UI for a decentralized P2P lending marketplace, deployed at lendr.cash
- Integrated WalletConnect protocol for secure BCH wallet authentication and on-chain transaction signing
- Developed real-time WebSocket updates for live loan lifecycle tracking, deposits, and payment notifications

Egg Business Management System

- Created daily entry tracking system
- Built MySQL database and implemented full CRUD functionality
- Developed automated weekly reporting and PDF export feature
- Designed responsive dashboard interface using Tailwind CSS

MediCare (Hospital Website)

- Developed a responsive hospital advertising website using HTML, CSS, and JavaScript.
- Integrated a user-friendly appointment form for patient inquiries and scheduling.
